

Oscar Torres, Software Engineer

Highly-skilled Senior React Engineer with over 3 years of experience in various industries, focusing on modern web development using React and related technologies. Adept at collaborating with diverse teams to design, implement, and optimize web applications. Demonstrated ability to guide teams in the selection and use of appropriate technologies, frameworks, and best practices. Proven track record of delivering high-quality products on time while maintaining clean, efficient, and scalable code. Committed to fostering a culture of continuous learning and embracing industry advancements.

Employment History

Senior React Engineer at OPIS, A Dow Jones Company

June 2022 — Present

- As a tech lead, oversaw the architecture of React projects, ensuring alignment with business and user needs.
- Worked with a team of developers to design and implement the overall structure, organization, and technical direction of projects.
- Guided the team in selecting and using appropriate technologies, frameworks, and best practices.
- Resolved technical challenges and debugged and troubleshoot issues.
- Played a key role in project planning, progress tracking, and stakeholder reporting.
- Led code reviews, mentored and trained the team, and identified and mitigated risks.
- Ensured final products were of high quality, delivered on time, and met stakeholder requirements.

Semi Senior React Engineer at The Estée Lauder Companies Inc.

February 2022 — June 2022

- Maintained and implemented new features and functionalities using Drupal and Perl for Clinique and Estée Lauder websites in Colombia, Mexico, and Chile.
- Focused on introducing new features and functionalities to enhance user experience and overall site performance.

Software Engineer at The Body Shop

January 2021 — January 2022

- Worked on migrating The Body Shop's legacy website to a new project built from scratch using React, TypeScript, React Context, Ionic, and SASS.
- Collaborated closely with designers and backend developers to meet project goals within tight deadlines, resulting in a promotion within the first month.
- Responsible for maintaining clean code within the team, including reviewing Pull Requests from all frontend developers.

- Solely responsible for implementing the cart feature, involving complex state management using React Context.
- Ensured testing coverage of over 80%.

Full Stack Developer at SIICOING

June 2020 — January 2021

- Redesigned a significant portion of an internal company application, improving performance and accessibility for users.
- Regularly interacted with users to gather feedback and further enhance usability and user experience.

Education

Advanced React, Meta

December 2022 — January 2023

- Learned to create robust and reusable components using advanced techniques and patterns for reusing common behavior.
- Gained proficiency in testing React applications with React Testing Library.
- Acquired skills in interacting with remote servers and fetching and posting data via APIs.
- Integrated commonly used React libraries to streamline application development.

Full Stack Developer, Computer Software Engineer, Soy Henry

November 2020 — March 2021

- Acquired knowledge in JavaScript, React, Redux, CSS, Styled Components, Node.js, Express, and jQuery.
- Gained experience in developing frontend and backend solutions using modern technologies to streamline processes for various businesses.
- Participated in activities and societies focused on modern web development technologies.
