PROFESSIONAL SUMMARY

I am a highly experienced senior React engineer with a strong understanding of React and its ecosystem, including proficiency in creating reusable components, managing state and props, and working with hooks. I have extensive experience with Redux or other state management libraries, and have a proven track record of designing and implementing efficient and scalable state management solutions. I possess advanced knowledge of JavaScript, including proficiency in modern features such as ES6, closures, as well as experience with webpack, babel, and other build tools. I am able to configure and optimize a build pipeline for a React application.

SKILLS

- Strong React proficiency
- Experience with state management
- Advanced JavaScript knowledge
- Build tools experience

EXPERIENCE

SENIOR REACT ENGINEER   *Jun 2022 - Current*
OPIS, A Dow Jones Company
- Oversee the architecture of the React project and ensure that it meets the needs of the business and the users
